

# Verticharge™ System

With increased numbers of laptop computers being introduced into classrooms to integrate ICT (Information Communication Technology) in teaching & learning, new solutions are required to adequately deal with the secure storage and charging of these laptops.

Dalmau Designs has developed the Verticharge™ System for holding and charging laptop computers and other small ICT devices. This unique system is comprised of a horizontal rail with 10 electrical outlets, a cable management tray, a row of horizontal divider fingers and a sturdy bottom tray for holding the laptops vertically.

Using this base system, a range of solutions for storing and charging laptops has been developed.

## Laptop Garage

The Laptop Garage is a free-standing storage cabinet that can store and charge up to 30 laptop computers at a time. This secure, easy-to-use cabinet is designed to be a “feature” piece of furniture for libraries, resource centres, administration buildings or classrooms. The Laptop Garage comes with a thermostatically-controlled fan tray to regulate ventilation as well as a lockable aluminium roller shutter door for security. Three Verticharge™ systems come standard with the Laptop Garage enabling 30 laptop computers or other small ICT devices to be stored and charged at a time. A range of colours are available for the front panel of this unit.

## Verticharge™ Wall Unit

The Verticharge™ Wall Unit is a secure, wall-mounted cabinet that can store and charge up to 30 laptop computers at a time. This cabinet is designed to facilitate ICT-aided learning in the classroom. It enables laptop computers to be easily accessed when needed but also stored and secured quickly when not in use. The unit features a sturdy steel construction, side ventilation grilles and a range of colour options for the front door panels. Three Verticharge™ systems come standard with the Verticharge™ Wall Unit enabling 30 laptop computers or other small ICT devices to be stored and charged at a time.

## Custom Verticharge™ Applications

The Verticharge™ system can also be used in custom applications. The back panel can be sized to fit into existing cabinets\* in a classroom or mounted on a wall in a secure room. The numbers of laptops able to be stored and charged varies depending on each individual set-up. To discuss the options available for this application, please contact Dalmau Designs.
