

## Cantilever Stick Store / Docking Station

Part # CSSDS

Dimensions: 2500mm H x 950mm D x 1000 mm W modules

The Dalmau Docking Station is a heavy duty cantilever racking system that combines a traditional cantilever racking unit with a cut-off docking station.

The adjustable central drop down bay allows a cut off saw to be aligned with the in-feed and out-feed shelf (included) for easy docking of lengths.

The unit has rear bracing and is anchored to the floor only. The unit comes in 1000mm wide modules and can be ordered in the overall length to suit the available space and length of stock being used.

The Dalmau Docking Station is ex RHS with hammer tone finish paint with the shelf ex 32mm 0E MR MDF laquered (for wood) and a 1.2mm galvabond sheet (for metal).

A backing board and drop down chute with connection point for central dust collection can be ordered as an optional extra.
