

Storage unit for sheet stock

Part # DVSS

Dimensions: 2500mm H x 1200mm W x 1200mm D

The Dalmau Sheet Store is a quality vertical storage unit for timber and acrylic sheet stock.

The unit has a number of different divisions to maximise the storage space for full 2400mm x 1200mm sheets, half height sheets and smaller offcuts. The open bays allow for sheets larger than 2400mm H to be stored.

The unit is made from 32mm OE MR MDF that is coated twice with lacquer to ensure a smooth surface that allows for high quality veneers to be stored safely.

The front kick plate can be removed which allows the unit to be easily relocated if needed.
